

COMMUNITY SUMMIT

Dynamics 365
Business
Central (NAV)

October 11–15, 2026
Gaylord Opryland Resort

The largest independent Microsoft AI & Business Applications User Conference on the planet.

| From Insights to Action: Power BI Reporting for Dynamics 365 Business Central that everyone can benefit

@ 2026 Dynamic Communities

| Speaker

- Renato Fajdiga, Derecjun, Director of Business Products
- From Zagreb, Croatia.
- More than 10 years in Dynamics world in various roles.
- Business Apps lead.
- Microsoft MVP and MCT for Dynamics 365 Business Central.
- Speaker at various conferences and co-founder of BizSource User Group Croatia.

@ 2026 Dynamic Communities

| Session Agenda

01

Why Power BI with Business Central

Different roles ask different questions. Where Power BI fits next to built-in reporting.

02

Out-of-the-box Power BI apps

Nine ready-made apps: install, configure, refresh, and open them inside BC.

Demo 1 · Finance & Sales & Purchase

03

Custom Power BI reports

Connect, model, visualize. When to use Desktop and when the browser is enough.

Demo 2 · Inventory report

04

Embedded analytics

Reports on Role Centers, lists and cards, with or without AL code.

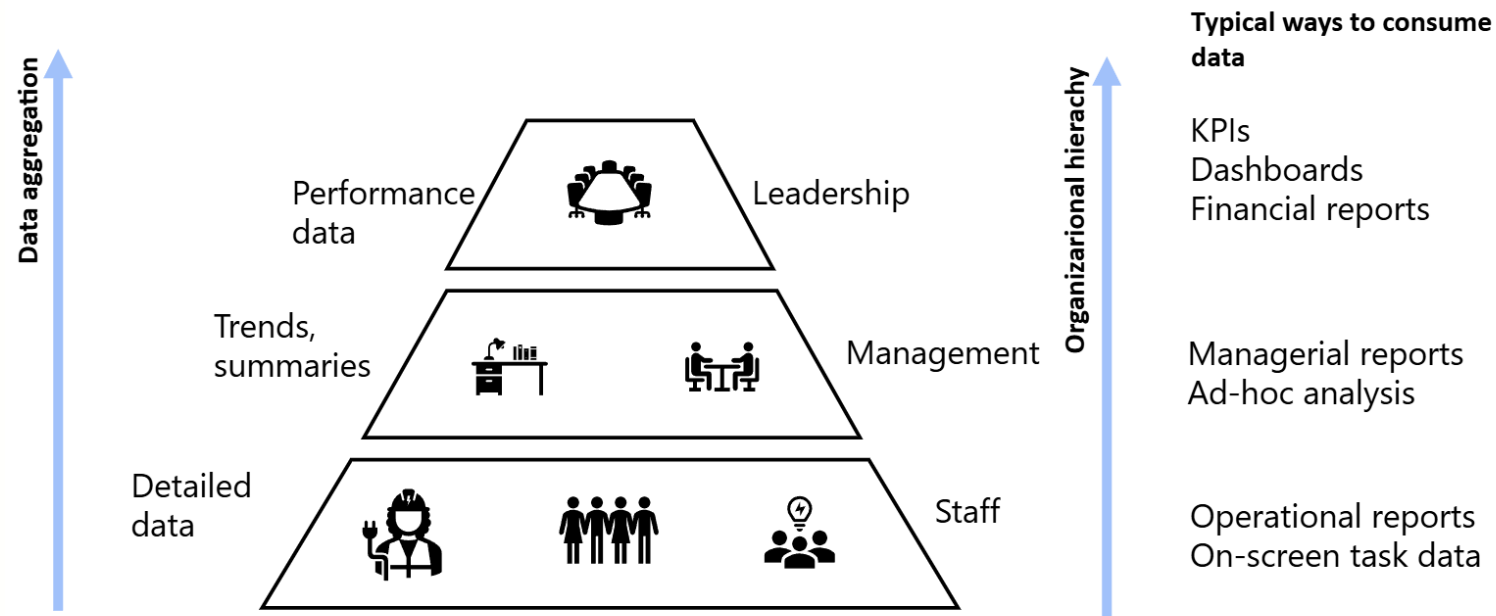

Demo 3 · Embed in BC

Then: key takeaways and Q&A

Organizational needs for reporting

- Analytical needs vary from different roles and how data should be presented.
- Reporting can be from building sales invoice layout through Excel layout for data analysis to the advanced analytics in Power BI.
- Analytics is not only charts and dashboards > it is about turning numbers into insights

| Right tool, right question

Report layouts

Word, RDLC, Excel

Documents to print or send: invoices, statements, picking lists.

Analysis mode

Quick ad-hoc pivots on any list, without leaving BC.

Financial reporting

Row & column definitions

P&L, balance sheet and KPIs straight from the G/L.

Power BI

Apps & custom reports

Interactive analysis across areas, shared with every role.

Microsoft Fabric

OneLake & Direct Lake

High volumes, many companies, many source systems.

Operational · detailed

Analytical · aggregated

Organizational needs for reporting

- Enables real-time, interactive visualizations over Business Central's data.
- Power BI is available for on-prem and online deployments.
- Start from scratch or use one of the predefined reports available out of the box in Power BI Service.
- Start easily with Power BI Desktop and continue with advanced features in Power BI Service.

The largest independent Microsoft AI & Business Applications User Conference on the planet.

| Leveraging out of the box Power BI reports

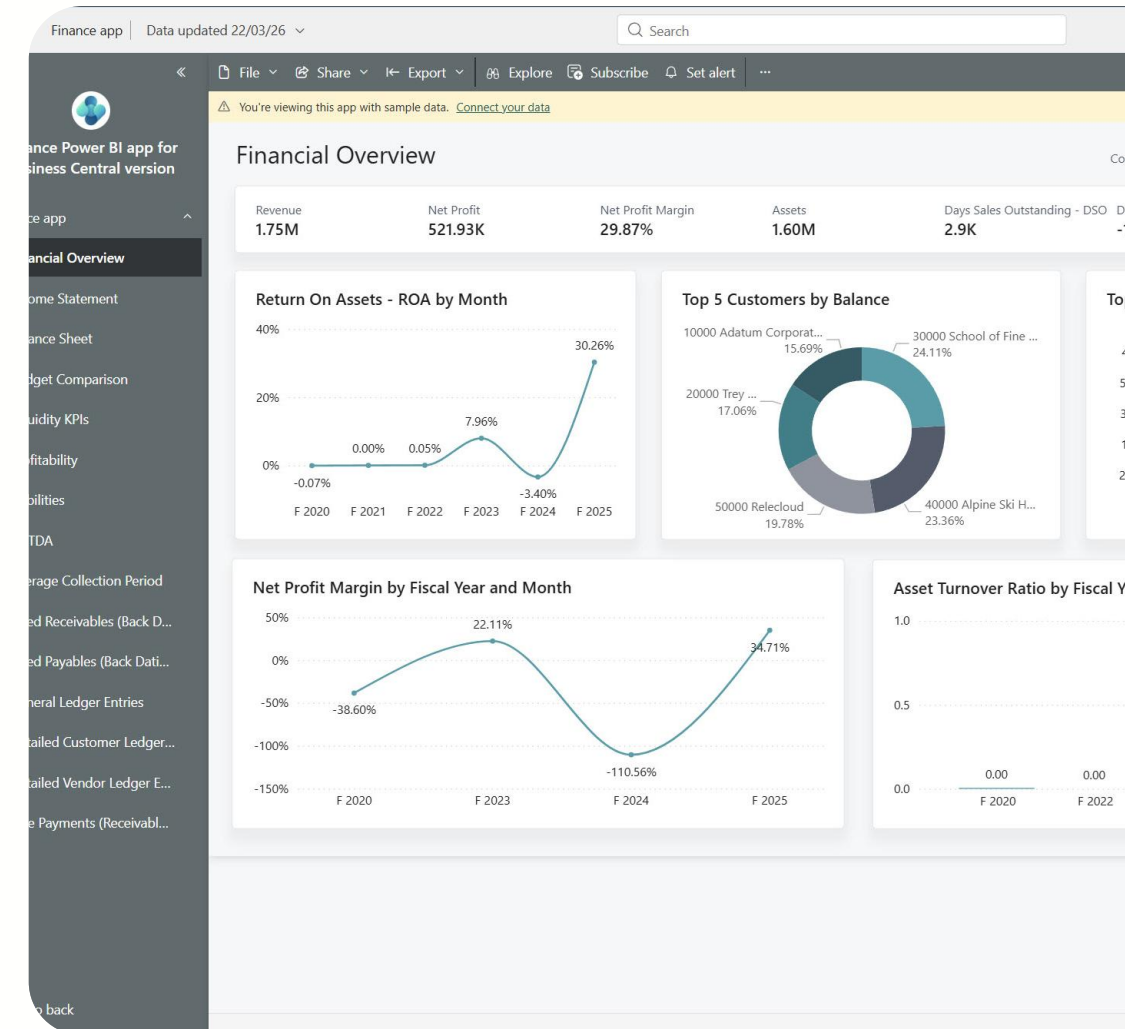

@ 2026 Dynamic Communities

Business Central Out of the Box Power BI reports

- Pre-built Power BI reports delivered as Power BI applications covering business areas such as Finance, Sales, Purchasing, Inventory, etc.
- Departments have a quick-start dashboard for analysis.
- Provides immediate insights

| Nine apps, ready to go

The largest independent Microsoft AI & Business Applications User Conference on the planet.

| Demo 1: Exploring built in reports for finance and SCM

@ 2026 Dynamic Communities

The largest independent Microsoft AI & Business Applications User Conference on the planet.

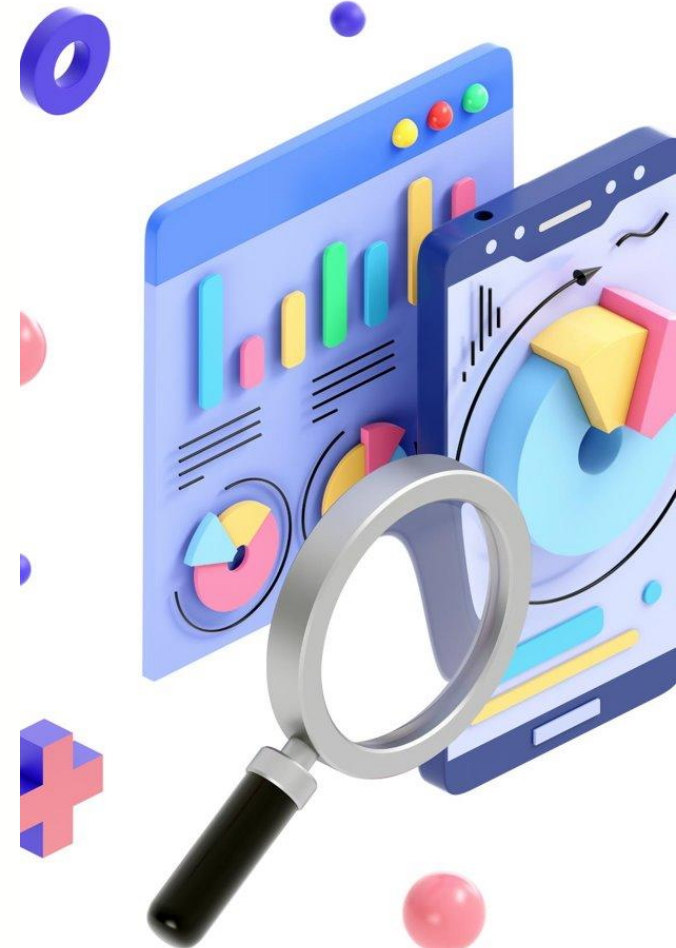

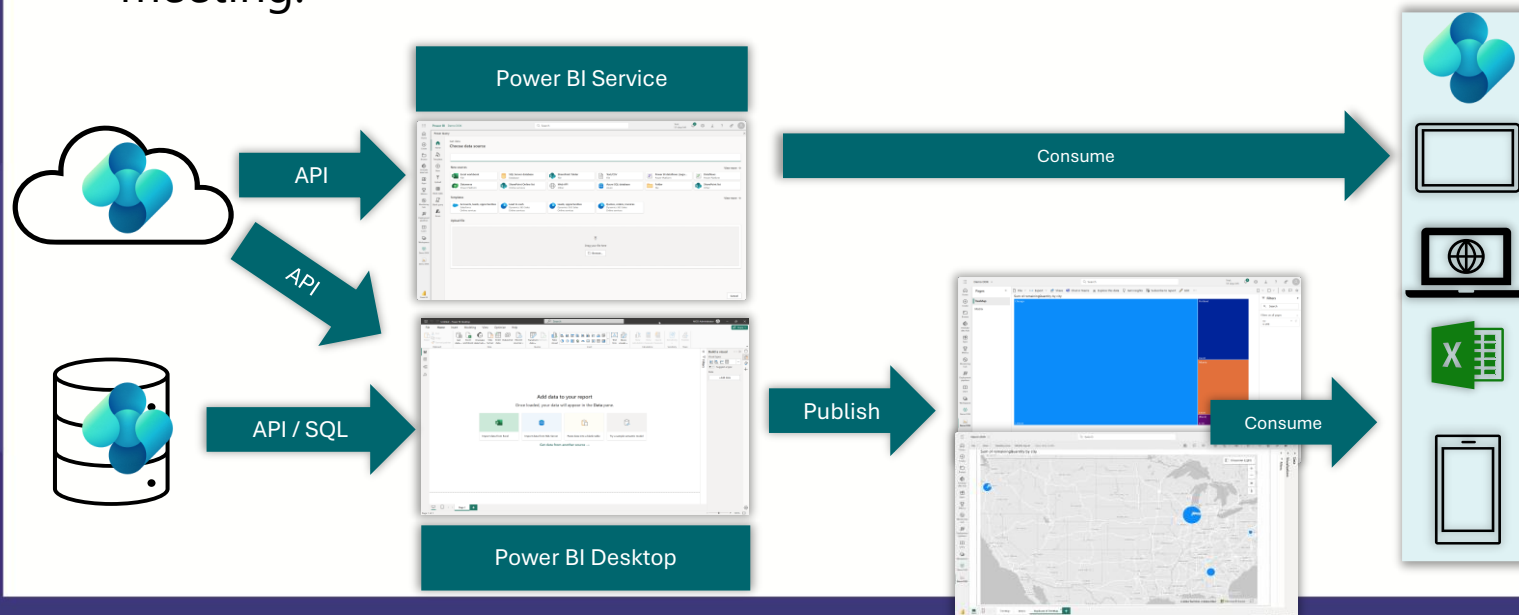

| Building custom Power BI Reports and Dashboards

@ 2026 Dynamic Communities

Why building custom reports?

- The standard apps don't cover your customizations or vertical.
- Reports need to combine BC with legacy ERP, CRM or external data.
- Download PBIX file and extend out of the box Power BI apps.
- Start from scratch with Power BI Desktop or Power BI Service.
- Consultants can easily prototype and adjust reports during client meeting.

| Extend or build?

Extend the standard app

CHOOSE WHEN

The standard KPIs cover most needs and you want extra pages or measures.

HOW

Download the PBIX in Business Central, extend it in Desktop, publish it to your own workspace.

KEEP IN MIND

You inherit Microsoft's model, calendar and measures. Keep your version apart from the template.

or

Build your own

CHOOSE WHEN

You have customizations, a vertical solution, or data from outside Business Central.

HOW

Connect to API v2.0 and custom APIs from Power BI Desktop, or directly in the Power BI Service.

KEEP IN MIND

You own the model, the refresh and the governance. Plan them like any other deliverable.

| Where the data comes from

SOURCE	EFFORT	USE IT WHEN
Standard APIs v2.0	● ○ ○	Core entities: customers, items, sales and purchase documents, G/L entries. <i>[Be careful with standard API V2.0 as they are sometimes not optimized for reporting]</i>
Custom API pages and queries	● ● ○	Custom fields, ISV tables, or faster reads with query objects.
Power BI app semantic models	● ○ ○	Reuse Microsoft's model through a live connection and add your own report.
OData web services on UI pages	● ○ ○	Quick prototypes only. Slower than APIs; avoid in production.
Fabric / data lake	● ● ●	Large volumes, many companies, or mixing BC with other systems.

Four moves in Desktop

1 Connect

- Business Central connector › environment › company › API
- Standard APIs v2.0 or custom APIs.
- Use read-only replica

2 Shape

- Remove columns you don't need
- Filter early; filters fold back to BC
- Clean enum values like _x0020_

3 Model

- Star schema: facts and dimensions
- One shared date table
- Measures in DAX, not calculated columns

4 Visualize

- Business Central theme for a familiar look
- Drill-through from totals to documents
- Design for the space it will be embedded in

Tip: save as a Power BI project (.pbip) to keep the report in Git, next to your AL code.

Connecting data with Power BI Service

- Connect your data, use Power Query online for data transformation, create relationships, write DAX formulas everything from your browser.
- Power BI Service (app.powerbi.com) supports full report creation:
- Connect to Business Central data (extract)
- Transform data using Power Query Online
- Build data models and visuals directly in the browser
- Supports contextual filtering: e.g. selecting a customer filters the report

The screenshot displays the Power BI Service interface. On the left, the 'Get data' dialog is open, showing a search bar with 'Business Central' entered. Below the search bar, there are sections for 'New sources' and 'Recent data (Preview)'. The 'Recent data (Preview)' section shows a table of financial data.

	Power BI Desktop	Power BI Service
Runs on	Windows app	Any browser, Mac included
Get data and shape	Full Power Query editor	Power Query Online
Relationships, DAX, RLS	Yes	Yes, with web modeling
Collaboration	One author per file; Git with .pbip	Several people edit one model at once
Saving	Save, then publish	AutoSave, with no undo
Best for	Complex models, version control	Fast prototypes with key users

The largest independent Microsoft AI & Business Applications User Conference on the planet.

| Demo 2: Building a custom Inventory Analysis Report

@ 2026 Dynamic Communities

The largest independent Microsoft AI & Business Applications User Conference on the planet.

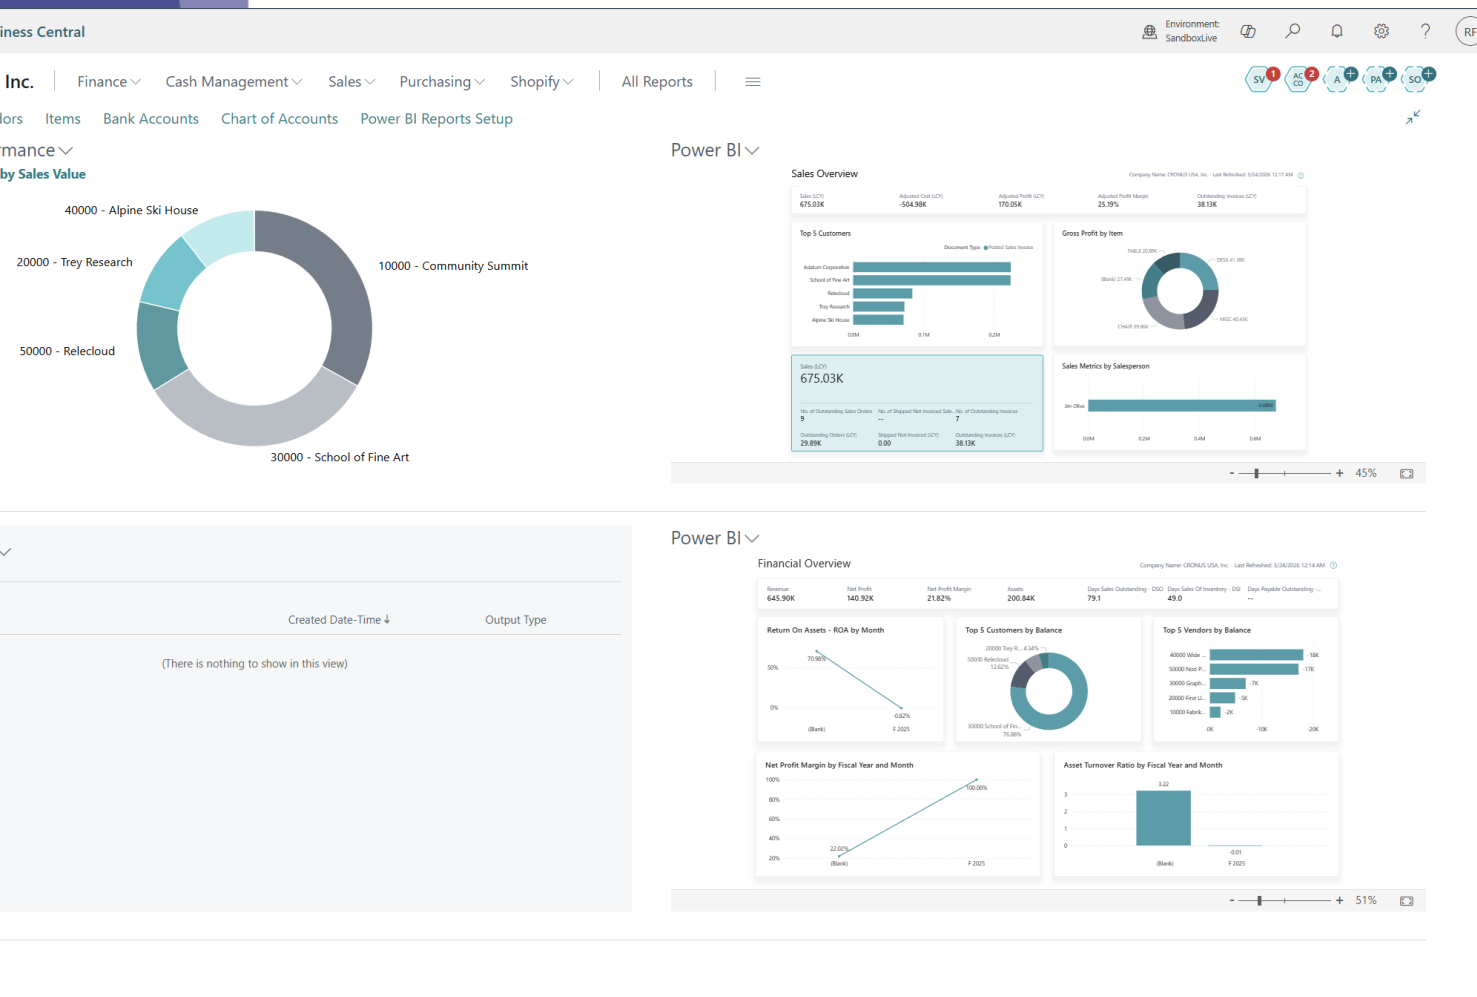

| Embedding custom Power BI Reports in Business Central

@ 2026 Dynamic Communities

Bringing Power BI Insights into Business Central

- Users can see and interact with reports and dashboards directly in Business Central.
- Capabilities exists on Role Centers and list pages.
- e.g. Purchasing manager can see vendor performance directly on vendor list and in the same time navigate to each transaction or document.
- Build report > Publish to Power BI Service > embed in Business Central
- Easy customizable to achieve the same on another pages (e.g. resource list).
- Call each specific report, visual, scorecard with code.

@ 2026 Dynamic Communities

Three ways to embed

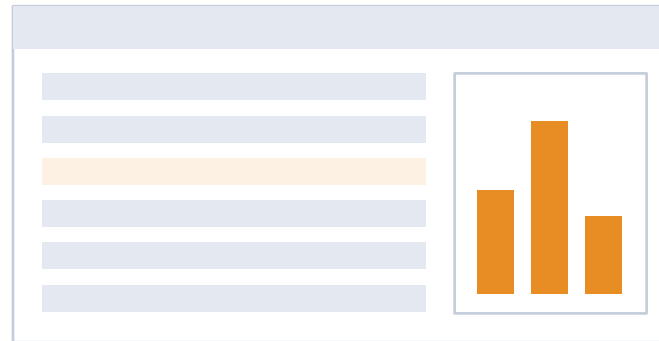

No code

Role Center part

Users pick reports from their own workspaces. Many Role Centers and five list pages already have the part.

A few lines of AL

FactBox on a list or card

Add the Power BI Embedded Report Part to any list or card; the report filters to the selected record.

AL + framework tables

Pinned report or full page

Lock a specific report, visual or scorecard, or open it expanded with an action (v26+).

The largest independent Microsoft AI & Business Applications User Conference on the planet.

| Demo 3: Embedding the custom Inventory Analysis Report

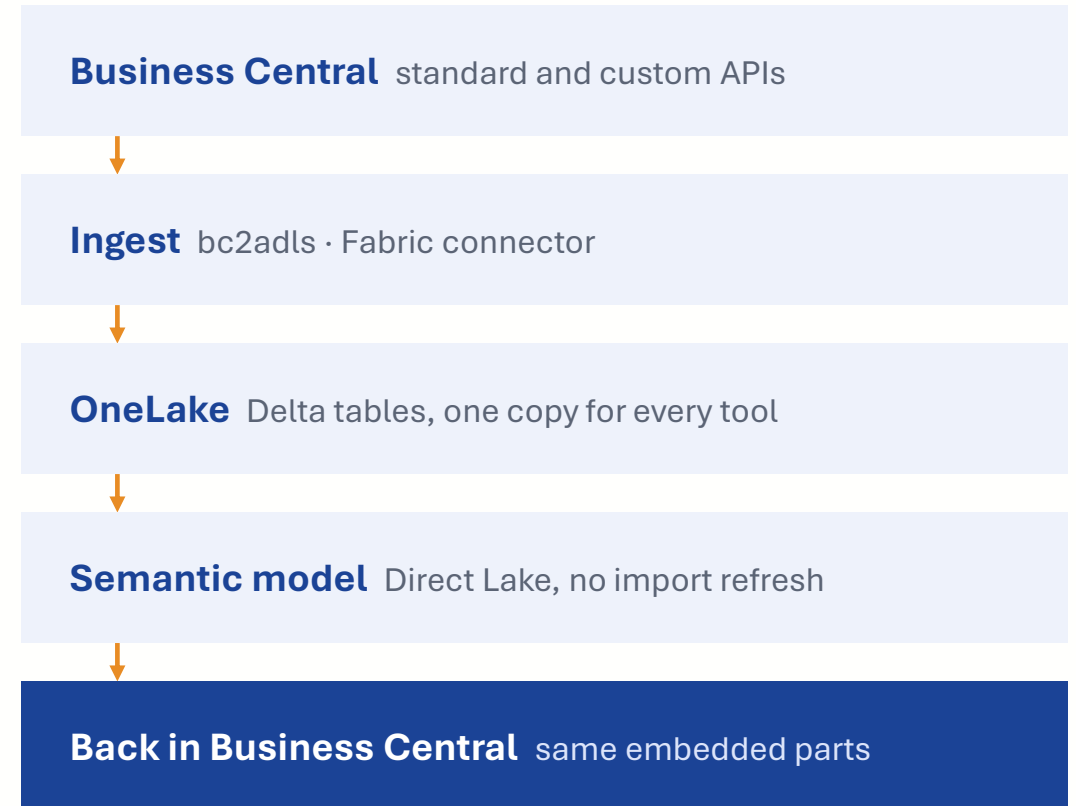

@ 2026 Dynamic Communities

| Next step: Fabric

Signs you have outgrown direct refresh

- ☐ Many companies or environments in one report
- ☐ Refresh windows keep getting longer
- ☐ BC data must be combined with CRM, WMS or legacy systems
- ☐ Forecasting, data science or AI on years of history

| Key takeaways

1

Start with the apps

Nine free apps give each department a dashboard on day one.

2

Build for your gaps

Custom reports on standard and custom APIs cover customizations and verticals.

3

Embed where work happens

Role Centers, lists and cards make BC one place for transactions and analytics.

4

Plan for scale

Fabric is the path for volume, many companies and many sources.
